# Maxlite promotes high-quality AAC blocks for Indian construction industry

Maxlite has been awarded the Best Brand of the year twice in a row by Times Business Awards in the cement and construction category. In addition, they have also been awarded the best emerging brand of the year by Reality+ Magazine. Through cutting edge indigenous technology, they are on the path to revolutionizing the construction industry in India.

*Maxlite being awarded the Best Brand of the year in the cement and construction category by Times Business Awards.*

Started in 2017, Maxlite has grown leaps and bounds. Located in the IT & Silicon capital in Bangalore, Maxlite has pioneered the AAC Blocks technology and is currently the only manufacturing unit in Bangalore city. They have been at the forefront providing high-quality AAC Blocks to become a leading player in the construction industry in India. They boast of a young workforce with an average of 23 providing employment for a prosperous work environment. Till date, Maxlite has recycled over 60,000 tonnes of the waste-product fly ash to make the AAC Blocks that has saved an approximate of 5,000 tonnes of CO<sub>2</sub> emissions.

Maxlite was founded by Darshan Kumar who is a successful serial entrepreneur. He is an industrialist with a demonstrated history of setting up businesses that scale. As the chief architect, he has pioneered the production of high-quality, lightweight AAC Blocks in Bangalore, India. As a young entrepreneur, Darshan has won many accolades including features on newspapers, magazines and events. He has been awarded the best innovative entrepreneur for green revolution in the construction industry in India.

*Maxlite is founded by Mr. Darshan Kumar, a successful serial entrepreneur with a passion to bring green revolution in the construction industry.*

## About Maxlite

Maxlite is a leading AAC Block Manufacturer headquartered out of Bangalore, India. Maxlite AAC Blocks are light-weight, durable, high load bearing and fire-resistant. All blocks are designed to be environmentally friendly to enhance green-revolution in our cities. ●
